The Indian Iron & Steel Database

2024 -25

JOINT PLANT COMMITTEE
An ISO 9001 : 2015 Organisation

Disclaimer

1. The objective of publishing the '**The Indian Iron & Steel Database**' is to bring in one place, a compiled list of units engaged in the production of iron and steel across the different States and Union Territories in the country and in doing so, present before the stakeholders of the industry, a picture of the nature and pattern of spread of the modern-day Indian iron and steel industry.
2. The reference year of the publication is **April 2024 – March 2025** and hence it covers all the units whose information is part of the iron and steel database maintained by JPC.
3. The unit listing published here covers units operational during the reference period.
4. The unit-level information, as featured in this publication, is based completely on the data submitted by the individual iron and steel manufacturing units to JPC.
5. All-out efforts have been made to make this compilation as exhaustive as possible. However, omissions, if any, may be attributed to non-submission of data to JPC. In case any unit is not featured in the relevant category, the same may please be brought to the notice of JPC with full details.
6. It may also be noted that the maps used in the State-level reporting have been sourced from 2024 Mapbox © OpenStreetMap. These are not as per scale and have been used only for illustrative purposes.
7. Care has been taken to validate all information before featuring it in this publication. However, at the same time, since the data featured here is as reported by the individual units to JPC, JPC will not owe any responsibility about any information found/available elsewhere about any of these featured units which is different from the one presented here.
8. Before using any of the information featured here for reporting in any work at their end, users are requested to acknowledge the source (i.e. JPC) and also apply their own checks. Further, JPC will not owe any responsibility if the information featured in this publication is represented differently in a third party report by an user.
